

NATIONAL MOVEMENTS & INTERMEDIARY STRUCTURES IN EUROPE

Antwerp, 17 April 2017

Statement regarding CEU

NISE, the international association of academics and institutes for the study of national movements, has cooperated in the past with the Central European University (CEU), its Nationalism Studies Program being a member of the association.

The program provides a highly regarded scientific environment for research on nationalism, having become an invaluable link for central Europe with the wider international academic community.

Its discontinuance would constitute a great loss for science, education and society as a whole.
