

EU research & innovation funding schemes

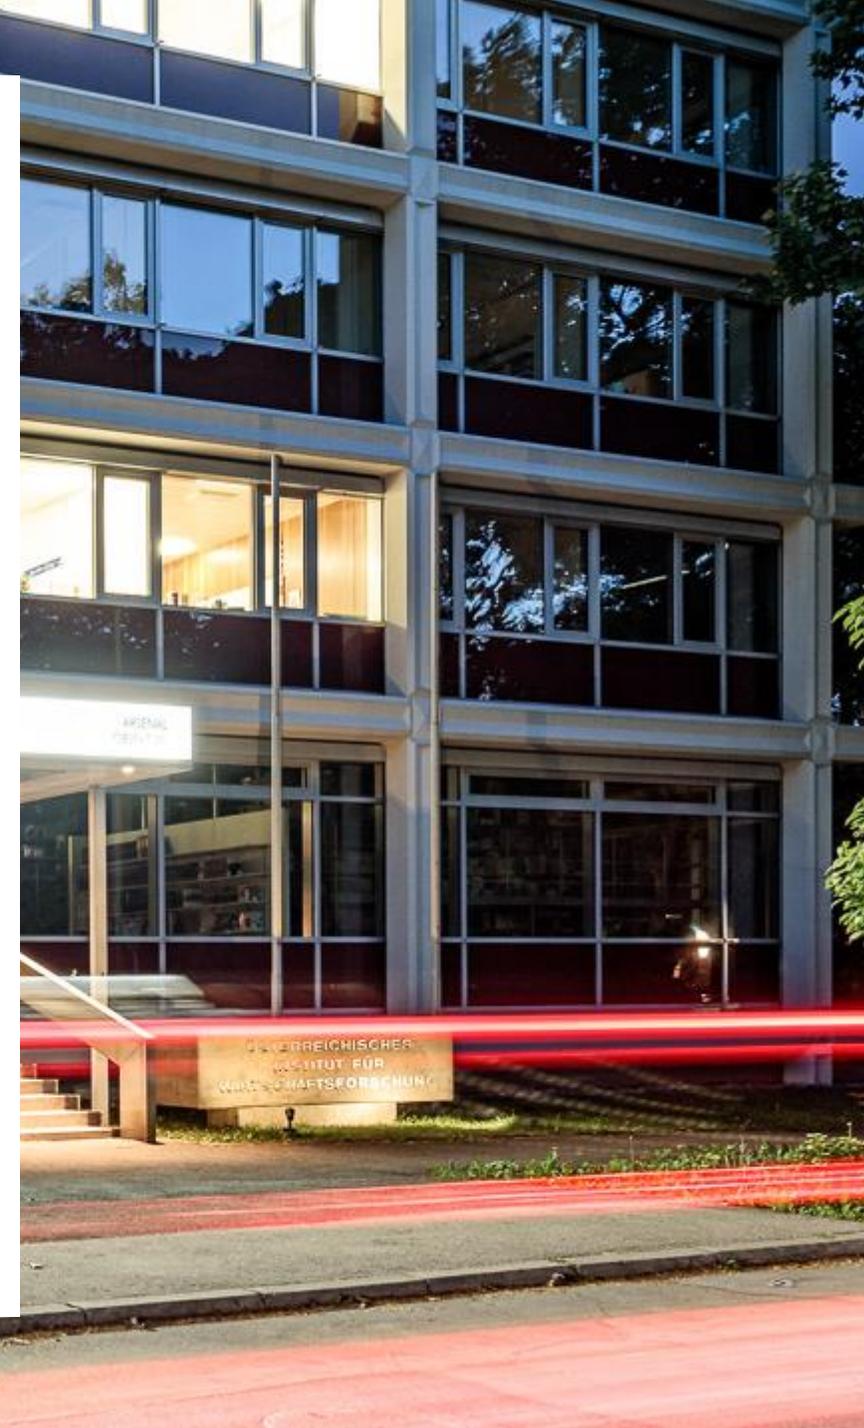

Using project-level data for monitoring & evaluation

Julia Bachtrögler-Unger

EVIDENCE-BASED POLICY MAKING

A collaborative event of WIFO, IHS and CEU

27 May 2021

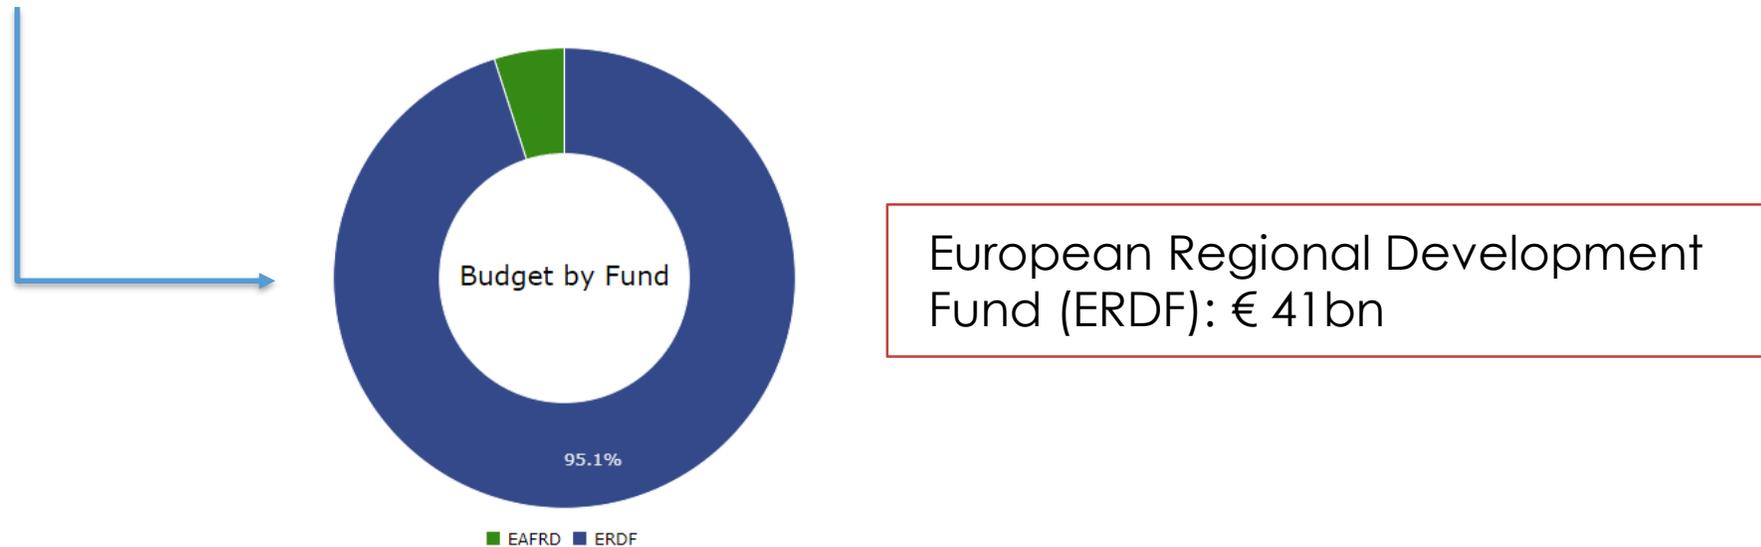

Why project-level data?

... for the analysis of EU (R&I) policies

- Transparency
- Exploring heterogeneous regional effects by „zooming in“
- Insights on policy implementation in terms of projects and beneficiaries in multi-annual financial frameworks 2007-13 and 2014-20
- Small-scale analysis
 - e.g. link with remote sensing data
- Micro-level analysis
 - Effects on performance of supported firms
- Detailed thematic information at project level
 - e.g. helpful for evaluation of the implementation of smart specialization strategies

Main EU funding instruments for R&I in the MFF 2014-2020

- Horizon 2020: € 80 bn
- European Structural and Investment Funds (ESIF): € 43 bn (9.4% of ESIF)

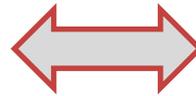

- Further R&I funding e.g. from R&I programmes within Euratom Treaty, Galileo, Copernicus, ...

Funding principles of main R&I funding schemes

■ Horizon 2020:

- **Excellence-based:** competitive tenders
- **Not place-based**, international cooperation as an asset
- **Centralised selection procedure and administration** (European Commission, national contact points)
- **Central monitoring** (CORDIS)

■ ERDF:

- ESIF aims at **smart, sustainable and inclusive growth** in European regions
- **Place-based:** project selection local strengths and structural characteristics (RIS3!), mostly non-competitive tenders
- Administration and project selection (mostly) at the **regional level**
- **No central database** of projects available

Combination of R&I funding schemes

- EC encourages regions to combine different funding schemes, e.g. JRC's Stairway to Excellence (S2E) project
 - **Critical mass of funding** in specific industries (and related industries), technological or policy areas (in line with RIS3)

- Prerequisite to investigate combination of R&I funding in EU regions:

DETAILED DATA ON DISTRIBUTION OF FUNDS

- Ways to link Horizon 2020 and ERDF funding data:

ISSUE #1: No central database of ERDF beneficiaries

- Beneficiary
- Thematic area

ISSUE #2: Different thematic classification systems

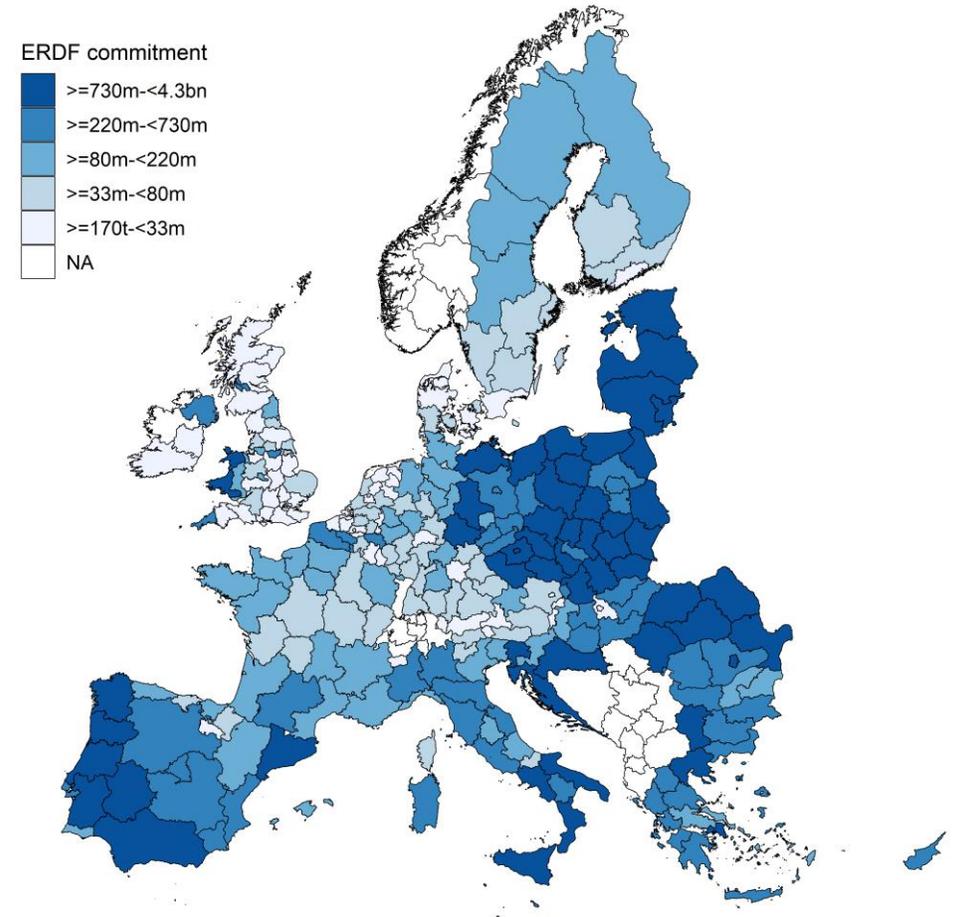

New dataset of R&I-related ERDF projects

ISSUE #1: No central database of ERDF beneficiaries

- Design of a database of projects co-funded by the ERDF (in the course of the Stairways to Excellence project by JRC)
- R&I viewer: <https://s3platform.jrc.ec.europa.eu/synergies-tool>
 - Regional Dashboard – ERDF, Regional Dashboard – Horizon 2020
- Technical documentation:
 - Bachtroegler, J., Doussineau, M. and Reschenhofer, P., Dataset of projects co-funded by the ERDF during the multi-annual financial framework 2014-2020, Publications Office of the European Union, Luxembourg, 2020, <https://www.doi.org/10.2760/491487>, JRC120637.

ERDF dataset at a glance

- More than 238,000 projects co-funded by the ERDF in EU-27 and the UK
- ERDF co-funding amount: €133.8 bn (67% of total ERDF budget)
- Coverage: 199 of 207 operational programmes and 58 of 87 INTERREG programmes
- Information required by Common Provisions Regulation available for over 90% of projects
- NUTS-2 (NUTS-3) information for 99% (89%) of projects
- **Update ongoing**

Using project-level data for monitoring & evaluation of EU policies

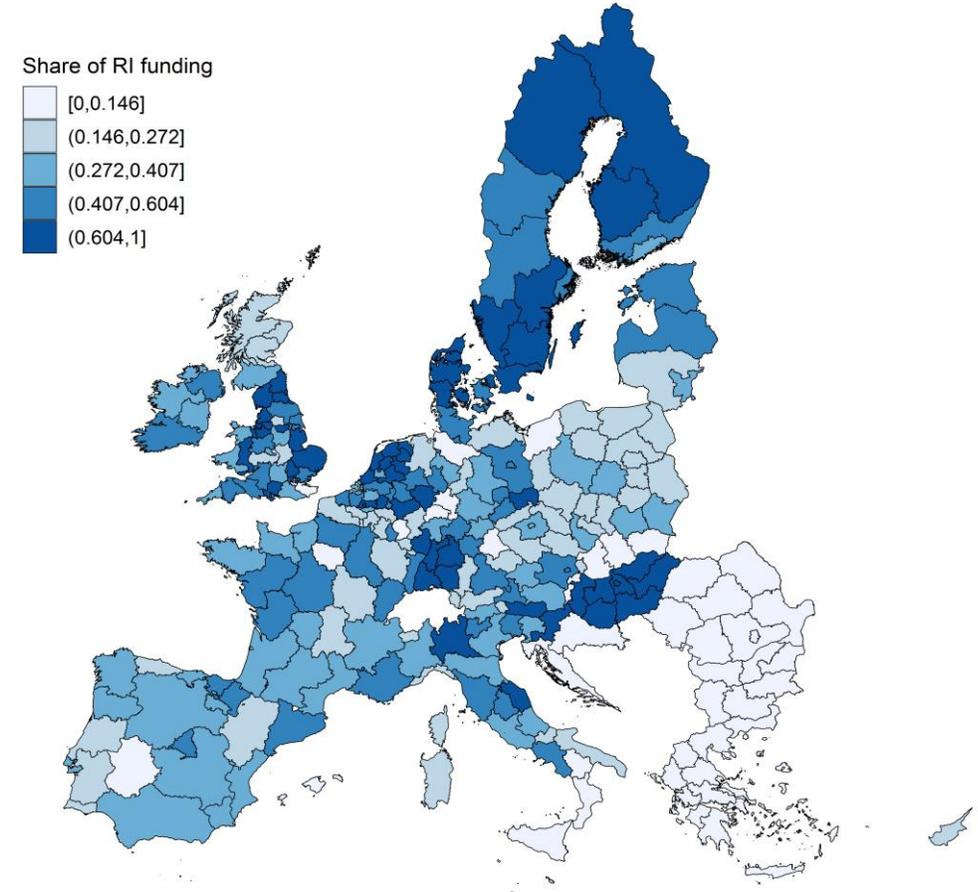

- Share of ERDF co-funding amounts committed to R&I-related projects
 - More than a third of 238,000 projects in the dataset (= around $\frac{1}{4}$ of the total ERDF co-financing amount) are related to R&I activities

Note: Hungary has only provided detailed project data for R&I activities.

See <https://cohesiondata.ec.europa.eu/countries/HU>.

New dataset of R&I-related ERDF projects: Enrichment

ISSUE #2: Different
thematic classification
systems

- Translation of project names and descriptions
- Linking the data set with business data (e.g. AMADEUS/ORBIS)

Ways to link Horizon 2020 and ERDF funding data:

- Names of ERDF beneficiaries are matched with Horizon 2020 beneficiaries
- Key enabling technologies (KET) and societal grand challenges (SGC) are assigned to ERDF projects based on project descriptions
 - Using the KNOWMAK ontology

Keep in mind ...

- Various issues due to varying degree of detail of original data (e.g. project descriptions), differing quality of AMADEUS matches, etc.

Interlinkages between Horizon 2020 and ERDF R&I funding Beneficiaries

- Share of ERDF beneficiaries carrying out R&I-related projects that also receive Horizon 2020 funds

Country	ERDF+H2020	Country	ERDF+H2020	Country	ERDF+H2020
IE	27%	LU	9%	HR	3%
AT	26%	ES	8%	CZ	3%
UK	23%	SI	7%	EE	3%
BE	19%	CY	7%	PL	2%
MT	17%	DE	7%	BG	2%
DK	15%	FI	7%	HU	2%
RO	12%	SK	6%	EL	2%
NL	11%	LV	6%	LT	1%
FR	11%	IT	6%		
SE	11%	PT	4%	Average:	5%

Interlinkages between Horizon 2020 and ERDF R&I funding

Thematic area

- Number of ERDF projects being assigned a specific KET or SGC
 - Total number of R&I projects in ERDF beneficiaries' database: 84,500

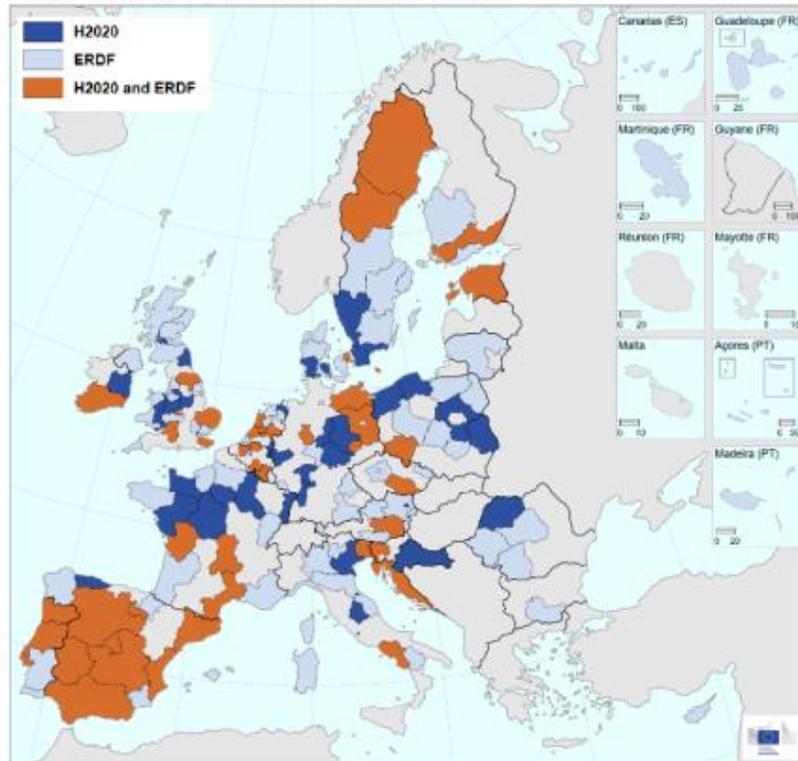

Key enabling technologies (KET)	Number
Biotechnology	28,800
Advanced materials	13,900
Nanoscience and technology	12,300
Micro- and nanoelectronics	9,000
Optics and photonics	7,900
Advanced manufacturing technology	6,400
Total number KETs assigned to 42,700 R&I projects	78,300
Societal grand challenges (SGC) ¹	Number
Europe in a changing world - inclusive, innovative and reflective societies	46,700
Smart, green and integrated transport	27,400
Secure, clean and efficient energy	24,500
Climate action, environment, resource efficiency and raw materials	24,100
Food security, sustainable agriculture and forestry, marine and maritime and inland water research, and the Bioeconomy	21,400
Health, demographic change and wellbeing	18,500
Secure societies – protecting freedom and security of Europe and its citizens	16,100
Total number SGCs assigned to 69,800 R&I projects	178,700

Interlinkages between Horizon 2020 and ERDF R&I funding

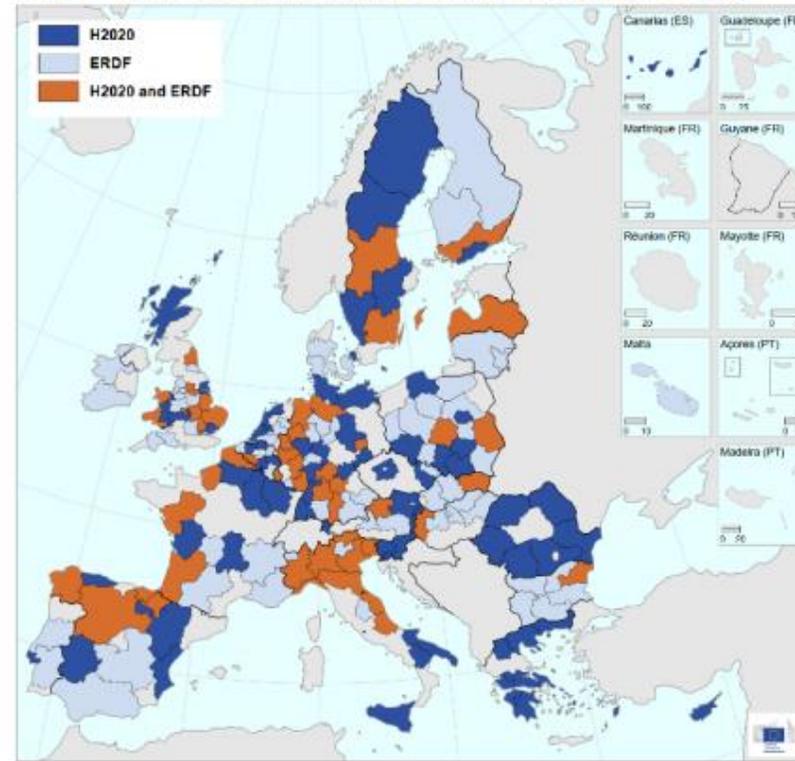

Thematic focus of funding by area (I)

- Is regional Horizon 2020 and ERDF R&I funding directed at the same technological areas?

Map 6 Industrial biotechnologies

Map 7 Advanced manufacturing and processing

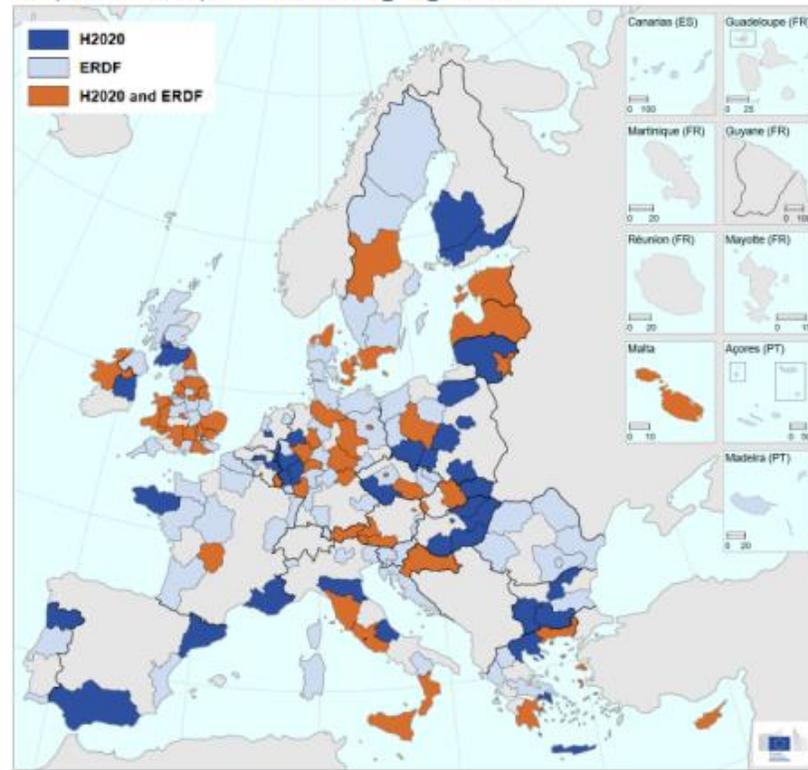

Interlinkages between Horizon 2020 and ERDF R&I funding

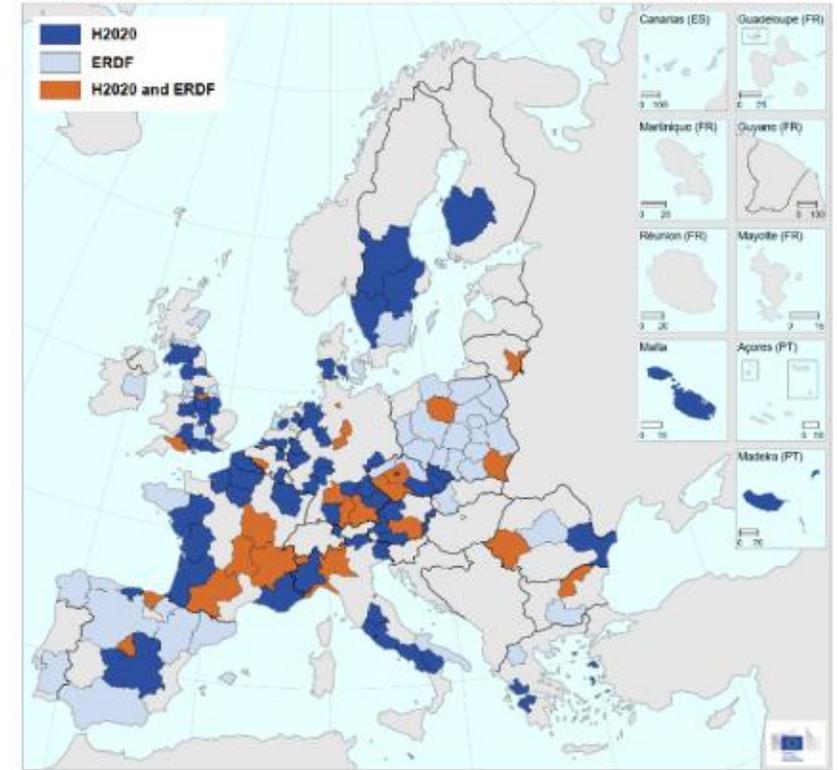

Thematic focus of funding by area (II)

- Is regional Horizon 2020 and ERDF R&I funding directed at the same policy areas?

Map 13 Europe in a changing world

Map 11 Smart, green and integrated transport

To conclude...

- Project-level analysis is a powerful tool to complement the regional analysis of the effects of EU cohesion and R&I policy
 - Link with other European and national funding programmes
 - Small-scale analysis at municipality level
 - Micro-level analysis at beneficiary level
- Future research questions in the context of R&I policies and smart specialisation
 - Is there a overlap of funding for similar activities, or are different tasks of the very same project funded by different funding schemes?
 - By bridging project categories: Is Horizon 2020 and ERDF R&I funding directed at priority areas (industrial, technological, policy areas) as defined in regional RIS3?
 - ...
