INVISIBLE UNIVERSITY FOR UKRAINE – WINTER HELP

Dear friends and colleagues,

Since April the Invisible University for Ukraine project, launched by the Central European University, in cooperation with Ukrainian partner universities and the Imre Kertesz Kolleg in Jena, has been offering online courses and a summer school for Ukrainian students affected by the Russian full-scale attack. In the Spring semester we had 140 students, from September we have over 200. During the last two months, with the systematic bombing of the critical infrastructure in Ukraine, it became increasingly harder for our students to follow the classes due to the lack of electricity. In agreement with our main Ukrainian partners (Ivan Franko National University and Ukrainian Catholic University in Lviv, Kyiv-Mohyla Academy, and other universities) we are trying to provide a number of power banks and generators that could be installed in student dormitories and could provide free access for students.

The costs of the power banks are 3-700 Euro, the generators are around 1500. Some of the universities are also planning to set up permanent units that provide electricity and internet to students via Starlink. If you can offer even a small sum, or can send our call to other colleagues who can do so, it would be of great help.

We rely on the donation line https://standwithukraine.in.ua/ managed by our graduate student in history at CEU, Oleksii Rudenko, to transfer the sums and the objects to these institutions. If you make a donation, please add in the remarks section IUFU or Winter Help to make sure it is earmarked for this purpose. Please also note if you prefer to remain anonymous.

Thanks for your help,

Ostap Sereda, Vladimir Petrovic, Nazarii Stetsyk, Balazs Trencsenyi, Renata Uitz (members of the Organizing Board of IUFU)
