

ENVIRONMENTAL SCIENCES AND POLICY

Who we are

We draw students with a shared passion for building environmentally sustainable and just societies from the most diverse professional and cultural backgrounds. Bridging the gap between science and policy, our research-driven programs give you strong academic foundations and real-life training necessary for understanding and solving complex environmental problems. You will tap into a network of professors, practitioners and students on campus and beyond, as well as invaluable research, field trip and internship opportunities.

What we offer

MS in Environmental Sciences and Policy (MESP) / 1 YEAR / This program provides students with a combination of scientific, technological, legal and policy training, preparing them for careers in a wide range of environment-related fields. The aim is to give students an understanding of how to approach environmental challenges and contribute to the design and implementation of sound and sustainable policies.

MS in Environmental Sciences, Policy and Management (MESPOM) / 2 YEARS / The program prepares students to identify and implement solutions for complex environmental challenges, especially in an international context. It is operated by CEU, Lund University (Sweden), the University of Manchester (UK), the University of the Aegean (Greece), the University of Saskatchewan (Canada) and the Middlebury Institute of International Studies at Monterey (U.S.). Learn more at mespom.eu.

WALEED CHAUDHRY / PAKISTAN

"The Department of Environmental Sciences and Policy bestowed on me the gift of life-long curiosity and the desire to do more and do it better. The friends I have made here are simply incredible. I'm constantly inspired by the diversity of their experiences and their passion for learning, so sharing this journey with them has been truly special."

PhD in Environmental Sciences and Policy / The doctoral program provides an exceptional opportunity to pursue fundamental and applied research to address some of the world's most urgent environmental challenges. Our graduates emerge from the program with a nuanced understanding of diverse approaches to environmental problems, extensive practical research experience, professional networks and analytical and practical thinking skills.

What you will study

Energy transitions and climate change • Environmental and resource governance • Environmental justice, politics and humanities • Sustainable management of socio-ecological systems • Resource management and pollution control • Methodological tools and techniques

Where your degree will take you

How to fund your studies

In pursuit of our mission, we strive to attract world-class graduate talent from all over the world. This is why we offer generous scholarships available to students from any country.

In 2018-2019, 82% of CEU students received financial aid, ranging from tuition awards to scholarships with stipends and housing. Learn more about how to fund your studies at www.ceu.edu/financialaid.

How to apply
